✧ HOW TO STORE AND MANAGE:

✓ Optimal Temperature to storage the glue is 35.6F - 46.4F (2C - 8C).

✓ Optimal Temperature for using the glue is 65F - 82F (18C - 28C) with humidity of 45% - 80%. Please use and store it in a stable , well ventilated environment.

✓ Exposing glue to oxygen could change viscosity , therefore diminishing the life of the glue. Please check if the cap is tightly closed after use, and wipe off the lid and nozzle.

✧ IMPORTANT NOTES:

✓ The glue is best stored in a cool place.If stored in a fridge,allow it to stay at room temperature for 1 hour before use. Shake the bottle well before use for 30 -60 sec.

✓ The client's eyes must be tightly closed throughout the extension process.

✓ Prevent contact with eyes or eyelids to avoid irritation.

✓ Best before 3 months after opening.

✓ Avoid subject lashes to moisture for 24hr after extension.

✓ Clean nozzle using a tissue before close the cap.

✓ Store the bottle inside the safe package with the silica gel.

✓ Shelf life and durability depend on how properly you storage.
